

Juan Saiz

Technical Artist & Pipeline Developer — Tools, Asset Pipelines & Real-time Optimization

Valencia, Spain · Open to remote or relocation

juansaizn@gmail.com · linkedin.com/in/juan-saiz · Portfolio: juansaizh.github.io

SUMMARY

Technical Artist with a 3D art background and 5 years building production pipelines for real-time Mobile/WebGL applications. I turn artist workflows into reliable, automated systems: DCC automation in MAXScript and Python, Unity Editor tools in C#, lightmap baking and texture pipelines, render farm automation and AI-assisted tooling. Currently Lead Technical Artist for a team of 9 artists, acting as the bridge between art, engineering and production.

CORE SKILLS

- **Pipelines & Automation:** Asset import/export pipelines, pre-flight validators, DCC ↔ engine interoperability (3ds Max → Photoshop → Unity / glTF), render farm automation (Thinkbox Deadline).
 - **Unity & C#:** Editor extensions (EditorWindow, ScriptableObjects), batch scene processing, prefab and scene assembly automation, JSON data export.
 - **3ds Max tooling:** MAXScript and Python (Qt / PySide2) tools, procedural generators, UV and lightmap automation.
 - **AI-assisted tooling:** AI skills driving 3ds Max through MCP to automate modeling steps from reference documents.
 - **Real-time Art & Optimization:** Materials and shading for Mobile/WebGL, lightmap baking and atlas packing, texture compression, polycount and memory budgets.
 - **Scripting:** C#, MAXScript, Python, PowerShell, JavaScript/ExtendScript, .NET.
 - **DCC & Tools:** 3ds Max (expert), Photoshop, V-Ray / Corona, Unreal Engine, ZBrush, Maya (basic), Git.
 - **Collaboration:** Team leadership, mentoring artists, technical documentation and workflow standards.
-

SELECTED TOOLS & PROJECTS

- **Floor Plan to 3D (AI · MCP · MAXScript)** — Five connected tools that turn a PDF floor plan into a bake-ready 3ds Max interior: an AI skill draws the splines, then *Shell Builder*, *Door & Window Generator*, *MultiMaterial Editor* and *UnwrapAll* build, furnish, texture and unwrap the scene.
 - **Quick Scene Switcher (3ds Max, Python/Qt)** — Dockable panel to edit 40+ scenes of a project in a single 3ds Max instance, with batch save and FBX export. Cut that task from 2 h to 5 min.
 - **Lightmapping & Web Exporter (3ds Max → Photoshop → glTF)** — Groups meshes by surface area to pack lightmap atlases, bakes lighting, post-processes textures and exports glTF + JSON metadata through a customized C# exporter.
 - **Unity Editor tools (C#)** — *Setup Location Scenes*, *Placement Tool* (up to 30% less time placing assets), *Lazy Tagger* and *Kitchen Creator*: data-driven tools for scene assembly, layout and tagging.
 - **Render Farm Post-Process (Deadline, Python/PowerShell)** — Distributed post-production and texture compression with self-healing jobs, saving up to 6 h per project.
-

EXPERIENCE

Custhome — Valencia, Spain

Interactive 3D applications for Mobile/WebGL · Oct 2021 – Present

Lead Technical Artist · Sep 2025 – Present

- Lead a team of 9 artists and own the technical quality of the production line.
- Validate assets against Mobile/WebGL performance budgets before delivery, ensuring visual fidelity within tight constraints.
- Primary technical problem-solver across the full stack: DCC tools, bake/render pipelines, real-time engine performance and infrastructure.
- Coordinate deliverables, resources and technical requirements across parallel projects.

Technical Artist | Pipeline & Tools Developer · Sep 2022 – Sep 2025

- Architected and maintained the central production pipeline connecting 3ds Max, Photoshop, Unity and the render farm; sole author of the company's internal tools repository.
- Built tools to automate pre-flight validation, scene assembly in Unity and final asset/metadata checks, removing hours of manual work per project.
- Developed Unity Editor extensions in C# and procedural/automation tools in MAXScript and Python, streamlining assets from creation to export.
- Established naming conventions, folder structures and technical documentation; mentored 12+ artists on tools and best practices.

3D Artist · Oct 2021 – Sep 2022

- Modeled and shaded assets and environments optimized for real-time Mobile/WebGL.
- Wrote my first MAXScript tools to cut repetitive production tasks, which led to the Technical Artist role.

Earlier Experience

- **3D Artist — AZVizFactory** (Alicante, 2017 – 2019): Modeling, shading and lighting for high-end architectural visualization; Unreal Engine real-time walkthroughs and scene optimization.
- **Freelance 3D Artist** (2016 – 2017): Interior and asset modeling for studios and private clients.
- **Audiovisual Technician — Bloom TIC Media** (Girona, 2012 – 2013): Motion graphics and 3D animation for projection mapping.

EDUCATION

Bachelor's Degree in Audiovisual & Multimedia — Escola Universitària ERAM, Girona · 2011 – 2015

LANGUAGES

Spanish (native) · Catalan (native) · English (B2 — professional working proficiency)
